

METRA

Oak wall shelf

pratika
intrano

« METRA is a shelf consisting of three TABIATT shelves which are connected to each other by two vertical uprights. »

The screw fastening system is integrated directly into the screws and is therefore invisible. A space between the tablards and the wall allows for the passage of an electrical cable.

Functional and elegant, the METRA shelf will find its place in your kitchen, in your living room or in the children's room: even cuddly toys can be stored elegantly!
